

Is Your Data Battle-Ready?

As regulatory demands rise and data expectations grow, organizations are feeling the pressure across systems, teams and compliance processes.

85% say compliance requirements have become more complex in the last three years.

64% believe tech investments tied to compliance provide better risk visibility.¹

So, how ready is your organization to demonstrate compliance? Whether that's ingredient traceability, automated labeling, product safety or sustainability. Your pathway to compliance starts here.

Compliance readiness checklist

For each “Yes,” give yourself **1 point**.

Unified source of truth

Do you maintain one central repository for all product compliance data across markets and channels?

Traceability of ingredients and materials

Can you trace origin, composition and suppliers for every ingredient or raw material?

Automated regional labeling and disclosures

Are product labels, warnings and disclosures dynamically updated to comply with region-specific regulations?

Verifiable sustainability and marketing claims

Do you use structured, auditable data to back claims like “sustainably sourced,” “clean beauty,” “cruelty-free” or “100% organic” ?

Audit-ready change trails

Can you generate versioned, timestamped trails of approvals, edits and compliance attribute changes at will?

Sustainability metrics tracking

Do you collect and report data on recyclability, emissions, ingredient sourcing and packaging?

Automated validation and compliance checks

Are your compliance rules automated (vs. manual review) to reduce errors and bottlenecks?

Rapid SKU isolation for recalls

In the event of a compliance failure, can you quickly identify, isolate and withdraw affected SKUs?

Seamless data sharing and integration

Is compliance data automatically shared with suppliers, regulators, e-commerce platforms and retailers?

Proof-anchored environmental claims

Are all environmental claims tied to verifiable certification or evidence and not vague “climate neutral” offset claims?

How did you score?

Count 1 point per "Yes" to gauge compliance maturity.

8-10 points ★★★★★

Compliance leader

Strong systems in place. Maintain momentum and adapt to new regulations.

5-7 points ★★★☆☆

Building momentum

Solid start, but key gaps in automation, auditability and traceability remain.

0-4 points ★☆☆☆☆

Needs acceleration

High risk. Urgent need to improve data, tools and governance.

Future-proof compliance with Centric PXM™

Compliance isn't a checkbox, it's a journey. With regulations evolving faster than ever, from global labelling laws to circular economy mandates, success now requires smarter data, faster change and greater transparency.

Centric Product Experience Management (PXM) unifies product information, digital assets, syndication and shelf analytics into one platform. Centralize data and automate enrichment, localization and channel distribution for faster, more successful product launches, reduced manual work, fewer compliance risks and high conversion cross 1000+ global channels.

Centric PXM provides the foundation to manage compliance data consistently, at scale.
